

SalaryLink for Aspect

# SalaryLink for Aspect

## Assign correct wage allowances to employees – entirely automatically

SalaryLink is a system that easily and precisely handles the various wage allowances to which the American shift planning system is not geared.

The system calculates the employee's wage allowance for staggered shifts and overtime in accordance with the employee's agreement. All rules and rates for these calculations are controlled via parameters. The statement is automatically forwarded to the company's payroll system.

## Very user-friendly

SalaryLink is a browser-based solution that can be administered with Internet Explorer - among others.

## With SalaryLink it is possible to:

- assign the wage allowances manually.
- edit the variable wage allowances.
- view the variable wage allowances.
- print out statements and statistics.
- control the parameters for the calculation of wage allowances.
- control system rights.

## SalaryLink in SAS's callcenter

SalaryLink was originally developed by Gamma Partner in collaboration with SAS for SAS's callcenter in Copenhagen but is now an individual product, from which all businesses that use Aspect can benefit.

*It is possible to print out the various statements and statistics using SalaryLink. The following shows an example of Morten Martinson's wage allowances for December.*

Date	Lemat	Løbel	Betalt	Beskrivelse
01-Dec-03	0415	3,00	117,00	Tilleg løn, 1300 - løn, 0000
02-Dec-03	0412	8,00	312,00	Tilleg søn- og helledage
06-Dec-03	0411	5,00	85,00	Tilleg fraværløst 1700-2200
11-Dec-03	0411	5,00	85,00	Tilleg fraværløst 1700-2200
20-Dec-03	0411	5,00	85,00	Tilleg fraværløst 1700-2200
21-Dec-03	0411	3,00	71,00	Tilleg fraværløst 1700-2200
23-Dec-03	2701	8,00	0,00	Ferie
26-Dec-03	2701	8,00	0,00	Ferie
27-Dec-03	2701	8,00	0,00	Ferie
28-Dec-03	2701	8,00	0,00	Ferie

## Technology

SalaryLink uses the same database as Aspect. This means that shift data only has to be entered once.

SalaryLink supports the Windows XP, Windows 2000 and Windows NT platforms.
